## PROJECTS & TECHNICAL EXPERIENCE

 **EA Mongo Utility**  
Leveraged use of MongoDB in the GE Healthcare EA server to improve database performance.

 **The AI Enterprise Bot**  
Contributed to the development of AI chatbots, their automation & integration for multiple platforms along with flexible deployment on the cloud; and built the respective analytics interface during internship at The AI Enterprise.

**Open Source Contribution**  
Been an avid open source contributor and contributed to Zulip and Creative Commons. Successfully merged PRs can be found on my github profile page.

 **Microblog**  
Fully functional microblog built with flask, postgresQL. It has features like password reset via email, personal messaging etc.

 **AI Compendium**  
Curation of all my ML/DL and Computer Vision projects.
